L29: Entry 3 of 5

File: USPT

Sep 1, 1998

DOCUMENT-IDENTIFIER: US 5802599 A

TITLE: System and method for allocating storage in a fragmented storage space

Brief Summary Text (25):

There are many benefits provided by the present invention. The use of a buffer exploits requests to store sets of objects in order to reduce internal fragmentation in storage devices. An upper bound on the time to retrieve a whole object from storage is determined which minimizes the time to retrieve an object from storage. The run time, cost and size of data objects being transferred are tailored to the capacity characteristics of individual storage devices, the operating characteristics like processing power, and the virtual memory management characteristics of the server.

Current US Cross Reference Classification (1):711/100
